## Helping the Sick and Injured

**Madison** was found next to Route 20. We took her in not knowing she was injured. The foster watched her movements and decided she needed to be checked out right away. She has a broken pelvis and several other injuries. She was taken to VVS for surgery. Upon further x-rays and examinations we were told the pelvis was broken several weeks ago and had started to heal. The doctors felt they would do more harm trying to "fix" her breaks so she is being carefully monitored and will go back to VVS for several follow ups. There still may have to be a surgery depending on further complications.

**Madison**

**Gracy**

**Gracy** is a sweet kitten that was trapped with her 2 sisters this summer. She had a ruptured eye when we got her, which was removed immediately at 5 weeks old. The vet mentioned she had an ear polyp that they were unable to reach. This would take a specialist. The VVS surgeon wanted to wait until she was bigger and older. She went in for major surgery to get the root which is behind her eye. It turned out there were 2 polyps. The good news is it didn't impact the vision she has in her good eye. Please keep this kitten in your prayers.
